

Name _____

Integers: Draw or Discard! Recording Sheet

Directions for playing the game

Each group receives a set of integer cards ($-8, -7, -6, -5, -4, -3, -2, -1, 0, 1, 2, 3, 4, 5, 6, 7, 8$) with 3 cards of each integer in the deck. With the deck of cards placed facedown, each player begins with a single card. On each player's turn, the player turns over the top card in the center deck so that the other players can see it. Then the player must decide to either draw or discard a card. If the player draws the card that is faceup in the center deck, he or she will add it to his or her hand. Otherwise, the player must discard one of the cards that he or she already holds and place it faceup on the top of the discard pile.

The next player can either begin her turn with the card on top of the discard pile or turn over a new one. The number of cards that can be in a player's hand is unlimited. A player can have as many or as few cards in his or her hand as wanted. The sum of the integers in a player's hand is his or her points.

The goal of the game is to be the person with the most points at the end (e.g., after 5 minutes of play, after 10 rounds, etc.).

Turn	Circle what you did		Number on the card	Your points so far
1	Add a card	Discard a card		
2	Add a card	Discard a card		
3	Add a card	Discard a card		
4	Add a card	Discard a card		
5	Add a card	Discard a card		
6	Add a card	Discard a card		
7	Add a card	Discard a card		
8	Add a card	Discard a card		
9	Add a card	Discard a card		
10	Add a card	Discard a card
